RE: Public Fire Protection  
San Miguel Consolidated FD, San Diego County, California

Dear Chief Chaney:

As a continuing program to keep insurance classifications up-to-date, Insurance Services Office, Inc. periodically evaluates all communities and areas which have public fire protection to assure that existing public fire protection is available to individual property owners. This insurance classification number is one of several elements used in developing property insurance premium calculations for many individual properties in your community. The last survey for San Miguel Consolidated was in 2009. We would like to visit your district sometime during the week of July 11, 2016 to verify that the current insurance Class 4/4X is correct.

Our survey will collect data about many items and features which will make up the overall evaluation. A study of the water supply and distribution system will be made. For the fire department, the data will include manning, equipment and training. The means for receiving and handling fire alarms will also be studied. The field visit itself will likely be completed in a single day.

The purpose of the survey is to gather information needed to determine a fire insurance classification which may be used in the calculation of property insurance premiums. It is not for property loss prevention or life safety purposes and no life safety or property loss prevention recommendations will be made.

We will contact you in the next several days so that an appointment date for the field visit can be confirmed and the needed data and pre-survey forms can be discussed. Please contact me if you have any questions about our work. Your cooperation and assistance in helping us collect this data is greatly appreciated.

Very truly yours,

John S. Gorman  
Field Representative
